Content of the Workshop

INTRODUCTION: The Awakened Citizen Program is a three year graded value education program for students studying in middle school and high school. The program is designed to open the minds of children and enable them to discover values. It provides a framework for decision making in their life and bring about a transformation from within.

ABOUT THE WORKSHOP: It was a two Days workshop which was lectured by great facilitators for Year 1, Year 2 and Year 3 modules. Training sessions are conducted for teachers to provide an introduction to the program material and provide insight into effective facilitation practices. Two day training sessions are conducted for each of the three parts of the program. Schools are provided with CDs containing the program sessions and facilitation guides that detail how to effectively conduct the sessions. In addition, resource people from Ramakrishna Mission conduct school visits and observe classes to provide feedback to teachers regarding facilitation practices and assess the impact of the program.

Each one of us, carries within, an infinite source of power, strength and goodness. This power and strength can be felt, every time we say "I can". This infinite power gets manifested as various possibilities. The more we consciously develop or manifest these possibilities, the more faith we develop in ourselves. The Awakened Citizen Program is designed to help discover and manifest the infinite power within each one of us.

Through various explorations, situation analyses, discussions and real life examples, the students discover the tremendous impact of manifesting these possibilities and the means to do so.

Learning outcomes:

Some key pointers;

- (1) Proper facilitation by the teachers to encourage students to think from various angles, participate in the discussions and learn from peers is crucial for the program to have a high impact on the students
- (2) The emphasis is on students discovering the values rather than being told what is "right" or "wrong".
- (3) The workshop is to **connect, be aware of, appreciate, be sensitized, observe, discuss, question, think critically, improvise and express.**
- (4) Learning outcome is a measurable, observable and specific statement that clearly indicates what a student should **know and be able to do** as a result of learning.
- (5) The teacher can **go beyond** prescribed content to nurture curiosity and further social and environmental awareness.

Which topics or aspects of the workshop did you find most interesting or useful and can be applied to the classroom teaching?

- (1) **THE MOTIVATIONAL APPROACH WHICH** will help in creating an environment that supports and facilitates both academic and social emotional learning.
- (2) **The feeling of "I CAN"** which help in increasing the inner strength and confidence among the students.

- **Comments and suggestions (How do you think the workshop could have been made more effective?**

Through various explorations, situation analyses, discussions and real life examples, the students discover the tremendous impact of manifesting these possibilities and the means to do so

The workshop provided specific distinguishing between learning and teaching/assessment.

Suggestion: The workshop could use more explanatory and interesting activity based method can be apply for discussion.
