The entire workshop was very enriching and interesting. Open discussion amongst the participants was very fruitful and enlightening. The most appealing aspect of the workshop was that there was a plethora of activities which kept the participants on their toes and ensured that there wasn’t a single dull moment. There was a deep comprehension of the content and culminated in discussion about the day to day problems faced by the teachers in classroom.

The Cha- Cha technique of **Chunk** it (teach in a chunk for not more than 15 minutes), let the children **Chew** on it, then **Check** it and finally make **Changes** to ensure better understanding by the students, was introduced to the participants. It was practiced in one session and was found to be very useful.

4. How will you implement the knowledge & techniques acquired to your subject?

- Using research-based strategic learning and teaching practices.
- By incorporating learning strategies into content coursework.
- Challenging the students in a positive way.
- Practice practical classroom strategies and explore classroom issues that impede student success and learn how to deal with them.
