

DEPARTMENT: PRIMARY

REPORT ON VIRTUAL TOUR OF NATIONAL MUSEUM OF AUSTRALIA

DATE: 03 May, 2016

In a futuristic attempt to bring the world to our classrooms, a virtual tour of the National Museum of Australia was organised on May 03, 2016 (in the school premises) in continuation of the Australia-India Bridge Partnership Project.

Under the aegis of Robot Museum Education Program, the students of class V got the opportunity to tour(live) the Australian Museum along with HM (Primary) and other teachers in attendance. The session, assisted by Robert Bunzli, provided our students a succinct and comprehensive insight into the history and culture of Australia using Telepresence Robots. The students were active and enthusiastic audience throughout the session. It proved out to be an opportunity of international exposure, interaction and experiential learning for them.

The virtual tour program is one step ahead in the BBPS' vision of making its students first class world citizens by providing an international dimension to their worldview.

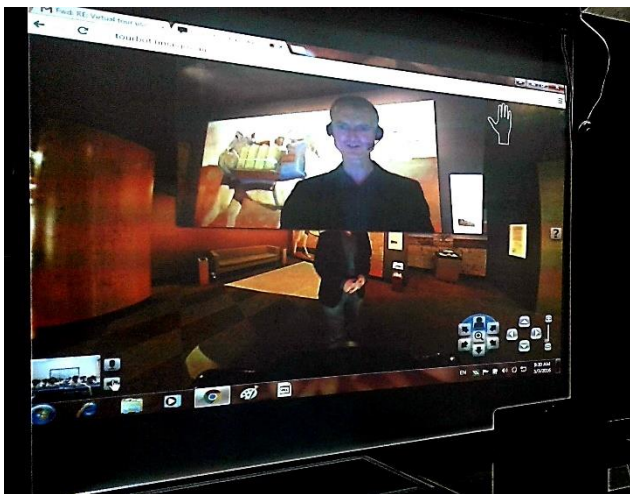

Glimpses of the tour

Côte-à-côte with our guide, Robert

The world in our classrooms...

Words of insight

The engrossed audience
