

KEEPING AWAY MOSQUITO BORN DISEASES – DENGUE

Dear Parent,

Dengue is the fastest growing mosquito borne viral disease across the world. Current reports indicate that intermittent rains and a warm humid weather have provided mosquitoes with ideal conditions to multiply. One *Aedes Aegypti* mosquito bite can inflict the dengue fever with joint pains, skin rashes, drop in the level of blood platelets, blood plasma leakage and can be fatal. Mosquitoes need to be fought against cohesively and valiantly.

In continuation with the Circular No.44/2018-19 regarding Dengue, Health & Wellness Club of the School appeals all the students and parents to survey and destroy probable mosquito breeding grounds in their respective homes, public places etc to fight against mosquito borne diseases. Individual alertness, on the part of every person is the need of the hour.

Kindly fill in the attached form and submit hard copy with evidence of mosquito breeding grounds in the form of photographs. Best entry will be awarded with a prize worth Rs.2500/-.

TOGETHER WE CAN FIGHT MOSQUITO MENACE

Prevent the spread of Dengue Fever

The mosquito is the most common carrier of the Dengue Virus.

Dengue Fever can be DEADLY.
