

Circular No.07/2018-19

Date: 20 April, 2018

ENVIRONMENT CLUB

QUIT USING POLYBAGS TO KEEP THE PLANET CLEAN

Dear Parents,

Plastic bags are harmful to our health and, impact the environment negatively by increasing the garbage patch bigger every minute as they are non-biodegradable and not easy to recycle. There are some chemicals in polybags, such as PCBs (polychlorinated biphenyl) and PAHs (Polycyclic aromatic hydrocarbons) which can disrupt the normal functioning of hormones in the body and develop into cancer or other serious conditions.

In school, no one including the staff is permitted to bring polybags. This will help to curb the detrimental effects of polybags on Health as well as Environment. If a child is found using the same, a fine will be imposed to make the child understand the need of the hour. Our environment is our heritage and our legacy, that we have inherited.

I, therefore, request parents to educate their wards to neither use polybags nor bring them to school for any reason. Use of paper/cotton bags is welcome.

Your cooperation will help the school to remain a polybag free zone.

**LET US ALL BE THE PART OF THE SOLUTION AND NOT POLLUTION
TOGETHER WE CAN, AND WE WILL!**
