

BAL BHARATI PUBLIC SCHOOL, NOIDA
A REPORT ON EDUCATIONAL TRIP
BOTANICAL GARDEN OF INDIAN REPUBLIC

“Trees are the earth’s endless effort to speak to the listening heaven.”

Rabindranath Tagore

In an endeavour to encourage students to appreciate nature and be able to recognize plants, trees and animals, an exciting trip to Botanical Garden, Noida was organized for the students of Montessori-I. The garden was established in April-2002 to address the urgent need for the conservation of endangered plants of the country.

The students and staff were given a warm welcome on reaching the garden and were taken around to show various types of plants. The plants and trees are grown in different regions as per their distinctive qualities. Students were very excited to see the lotus flowers in pink and white colours in a small pond. Some interesting sections developed by BGIR were cactus house, medicinal plants section, section of plants grown without soil, section of spices and condiments. Children were very excited to see the butterflies, dragonflies, small caterpillars and humming bees.

Ready to go

Lotus pond

A walk amid nature
