

### **BAL SABHA ACTIVITY (12.7.17)**

#### **Report on INTER-HOUSE DEBATE COMPETITION (CLASS: IV, V)**

##### **“TECHNOLOGY A BOON OR A BANE FOR THE HUMAN RACE”**

In our everyday life we often come across the question “Is technology a boon or bane for the human race?” The impact of technology in our lives, today, is unmeasurable. We use technology every day but like a coin has 2 faces, technology can also be used or misused. Over the years, we have stopped writing letters, instead tapping out informal emails. We do not remember phone numbers, depending on our mobiles to pull them up for us. We do not remember birth dates, because that's what Facebook is for; we also wish people there instead of making that two-minute personal phone call. We do not make the effort of remembering spellings because there's spell-check and auto-correct. We talk to people miles away from us and ignore those who are sitting right next to us. Despite the disadvantages associated, technology still has made our lives very comfortable in fact it is very difficult to imagine our lives without the modern technology.

This Bal Sabha activity was done in two rounds. The preliminary round was conducted on 11.5.17 based on it finalists were selected by the house representatives. The students of classes IV and V were paired as teams for the final round. Being a inter house activity there was one group from each house. The teams were mentored and trained very well by the house representatives. On 12.7.17 we had the final round of the debate. Ms. Asha Menon was our esteemed judge for the event. The students participated very enthusiastically. This activity not

only helped the students brush up their knowledge on technology and got to know the latest trends but also helped them to refine their soft skills.

**Results:**

Ashoka house turned to be the winner followed by Raman house and at the third position we had Tagore house.
