

### **REPORT ON INTER-SECTION BAL SABHA ACTIVITY: MATHS QUEST**

The noted philosopher Francis Bacon once said that if a man's wit is wandering, he should study Mathematics. It is very apt saying because Maths can be as engrossing as it is disciplining. In order to encourage students' interest and enhance their Mathematical and Logical skills, an Inter- Section Bal Sabha Activity on fun with mathematics was held for the students of classes I – V on 29<sup>th</sup> November 2017. The students tested their skills through Sudoku and Rubik's cube within the given time limit and the activity saw enthusiastic participation.
