Date : 23 July, 2018

KHAN ACADEMY MODULES **(CLASS-VI MATHEMATICS)**

"Mathematics is not about numbers, equations, computations or algorithms : it is about understanding"

- **William Paul Thurston**

Dear Parents,

Khan Academy Modules were introduced in Class VI as a pilot project in the academic session 2017-18 and now is a part of regular curriculum. Khan Academy Modules were aimed at providing the Hands On experience to all the students. Special training sessions were arranged for the Maths faculty in order to train them the integration of the programme in teaching / learning process. The modules of Khan Academy are used for effective introduction and explanation of concepts of Mathematics. The question bank is given as home / weekend assignment to the students. The feature of Skill Summary is used for effective assessment of the students to find out the teaching learning gaps.

Students are enjoying solving questions from the assignment sheets provided in the module. They are able to check their score immediately after completing the sheets which keeps them motivated. They are able to continue the assignments at home as well.

Since parents are important stake holders in child's school journey, we request you to send the feedback report at bbpsnd@hotmail.com covering the following aspects.

- Is your ward finding the Khan Academy classes interesting ?
- Is there an improvement in the learning of Mathematical concepts ?
- Does your ward still face Maths Phobia?
- Is your ward finding it convenient to handle the gadget?

Looking forward to your suggestions and feedback.

Asha Prabhakar
