

**DEPARTMENT: PRE-PRIMARY**  
**BAL SABHA ACTIVITY REPORT**  
**"FUN WITH SHAPES - "CUBOID"**

**Date: 24.11.2021**

**Classes: Pre-School & Pre-Primary**

**Venue: Virtual Classrooms**

**Fun with Shapes- "Cuboid"** was an experiential learning activity. All the Pre School and Pre-Primary children participated in this activity with a lot of enthusiasm. This activity was designed to help the children understand the concept of solid shapes.

The facilitator initiated the discussion on 2-D shapes that we see around us like circle, square, triangle, rectangle etc. All the children were asked to observe the shapes in their immediate surroundings like windows, doors, mirrors, cupboards, a colour box etc. The facilitator explained to the children that the things which we can hold in our hands and feel their shape and size are called 3-D solid shapes.

A hands-on learning experience was given to the children where they all were taught to construct their own cuboid using pastel sheets. The facilitator guided the students to observe the shape of all the faces of the cuboid.

The facilitator then guided the children to count the sides, corners and edges of their created cuboid.

**Learning Outcomes:**

The children understood the concept of 2-D and 3-D shapes.

The activity enhanced the student's fine motor skills.

The children learnt about the Cuboid shape, its faces and corners.

The activity helped the students to enhance their spatial sense.

## FEEDBACK OF PARENTS

Activity gave a 3d visual experience of shapes and was good for better understanding of shapes and their sides, edges and faces.

Thank you, so much dear Ma'am, with all your hard work and passion towards the students. Recreational class is beneficial for our children which you learn so many different types of activities, craft and develop fine motor skills.

P/o Nitika Shree  
PP F

Excellent activity. Classes seems like play but there is a lot of serious learning going on. These activities were engaging and useful too, she is now able to recognise all the shapes. Thank you so much once again.

Cuboid activity was a nice activity for kids to give the knowledge about the solid shape. Cuboid is little different from cube. You have increasing thinking ability of kids to understand the 3D shape. This shape is little difficult for our kids but you have provided exact concept of the shape having 6 face 8 vertical and 12 edges at that age this understanding is good for our little one. Special thanks to Ms. Nikita mam and Ms. Anju mam who made this learning of shape experience easy and enjoy full for our kid.

PS C

I would like to convey my appreciation to all the teachers of the school who have themselves been struggling with mix of online offline modes of teaching without ever complaining just to ensure kids are comfortable and are understanding in the same manner as they would have been in offline school. The cuboid making activity was amazingly done in the class which actually developed the geometric thinking of my child. He enjoyed doing the work. Special thanks to Anju ma'am who made the concept clear to students in a fun loving and interesting way.
