Date : 28 May, 2019

## **ENVIRONMENT CLUB** **'Let's be the Power Savers'**

The summer in our country gets easily as hot as 45-degree Celsius. In such conditions, we all use a variety of appliances to ease the scorching heat. It is very common in India for people to consume high amount of electricity to overcome the heat. during summers We know all the above for a fact but also know that our electricity bills roar during the summer season due to over usage and ignorance of some easy green practices that we can easily follow to conserve energy at our end. Making smart choices can help prevent the wastage of energy and conserve our natural resources.

The best means for conserving energy can be practiced the following tips provided below.

- Always turn off your electric gadgets like laptop, phones, television etc when not in use. Do not put them on standby mode.
- Try to replace bulbs with LED and CFL bulbs. It will save 75% energy and run longer.
- Go on scavenger hunt in your home/workplace to ensure proper insulation of wires.
- Clean your refrigerator coils, filters of air conditioner etc on regular basis for efficient working and less consumption of energy.
- Use high energy star rating appliances for less consumption of energy
- Use curtains/Blinds to stop heat to enter your rooms. It will keep room cooler.
- Turn off lights and fans if leaving your room.
- Wear light colored clothes to keep yourself comfortable. It will reduce power consumption to keep yourself cool.
- Go solar and be energy warriors.
- Plant indoor air purifying plants like Snake plant, Money Plant Aloe Vera, Tulsi,, Areca Palm, Lady Palm, Bamboo Plant, Rubber Plant , Dracaena, Philodendron etc to use less air purifying machines in rooms.
- Plant trees to keep your surroundings cool and healthy.

We seek your co-operation in the efforts to conserve energy and our resources. This will help children to learn and inculcate a habit of saving their resources and money. By practicing greener ways and doing their bit to overcome the climate change.

**Together by our smart choices, We can beat the heat and be the power savers.**
