## **CAREER FAIR - 2019**

*"The future depends upon what you do today."*

*- Mahatma Gandhi*

Dear Parent,

Career awareness involves understanding of basic career concepts and the ability and discipline to use that information to make wise personal and career decisions; choosing the right education & training pathways. **In a recent survey conducted by Mindler Inc on career awareness amongst the Indian students revealed that a staggering 93% of the students aged 14 to 21 were aware of just seven career options-law, engineering, medicine, accounts and finance, design, computer applications, IT and management; though there are more than 250 different types of job options available in India.**

If students are not aware of the huge number of career options present in India, many students will not be able to find the right jobs for themselves, while companies too will face the problem of job vacancies that will never be filled.

The ideal age to start considering career counselling is 14-16 years where the students start with subject exploration and selection and then work towards identifying their careers.

If parents can also build awareness regarding the new evolving career options, they can be playing a very helpful part in the child's career decisions rather than being one of those parents who push their child into one of the most common careers simply because they are unable to understand which area would be the perfect fit for their child.

**In order to give wings to the aspirations of our students, the Career Guidance Cell of BBPS Noida is organising a two day Career fair for the students and parents on the 20th and 21st December 2019.**

**We will be welcoming the topmost universities of India, the career gurus who will help the students rise beyond the cliched career options and steer them towards options where work will not be for livelihood but for everlasting happiness and satisfaction**
