Date : 05 July, 2017

VOCATIONAL EDUCATION FOR SKILLED INDIA

“Education is not the learning of the facts, but training of the mind to think”

- Albert Einstein

Education is a process which empowers a student to think for himself/herself and make decisions related to livelihood for his/her life. However in today’s scenario of cut throat competition and reduced opportunities for employment some students find it difficult to cope with regular academics and are victims of mental health problems such as excessive anxiety and depression which is also one of the main reasons for high rates of suicide amongst teenagers. However, if a student is allowed to pursue his/her own interests, understand his / her potentials and capabilities and is given unconditional support his / her personality will bloom and would promote her to be successful professionally.

Vocational education is one such system of education which prepares the individual for jobs that are based on manual or practical activity. In the past vocational education was associated with some stigma but with Prime Minister Modi’s Skill India initiative demand for higher level of skills both in government and private sector has increased.

State Industrial Training Institute, Noida in its initiative is launching vocational education courses such as Computer Operator and Programming Assistant, Basic Cosmetology, Gas and Electric Welding, Electronic Mechanics to name a few which can be opted by students **who are 8th pass and 10th pass.**

For more detailed information, Parents and Students can contact, **The State Industrial Training Institute, E-1, Sector 31, Nithari Village, Opposite Child PGI Hospital, Noida** or can contact on Mobile No. 9818603030, 7988171891, 8285235295, 9891026724
