REPORT ON VISIT TO NRCPB (NATIONAL RESEARCH CENTER ON PLANT BIO-TECHNOLOGY), PUSA CAMPUS.

15 Biology students of class –XII along with their teacher Ms. Amita Ganjoo visited NRCPB (NATIONAL RESEARCH CENTER ON PLANT BIO-TECHNOLOGY), PUSA CAMPUS on 27th October 2015.

Rightly said by Benjamin Franklin 'Tell me and I forget, teach me and I may remember, involve me and I learn.'

This was the essence and approach at NRCPB. Amidst the Google-run 21st century, educated families we still have a narrow minded approach towards career options. It was only till an interaction with Dr. S.R. Bhatt, Professor at the center who enlightened them on the fact that Medicine is not the end of Biology. There are many research fields in the arena of science to find solutions for the prevailing problems. It was his motivational interaction which invoked a hidden Watson in each one of them with a will to do something great. After this, the students were shown a short presentation on the various resources and accomplishments of NRCPB.

The Students departed for the Genomics section where they were shown the Gene Gun, PCR Machine and Gel Electrophoresis kit required for different biotechnological processes followed by detailed explanation about their working by researchers.

They could relate everything with NCERT Textbooks and it became intriguing with each lab. They realized that it is the conceptual understanding of basics which will take them a long way.

All the students felt privileged to be a part of such an educational exposure and realized that it is the time to take up the charge of the treasure hunt God left for them to decode.

Inspirational Guidance

Exploration at its best

Tissue Culture Lab

A peep into the world of Bio-technology

Gel Electrophoresis

An amiable collaboration & A satisfactory outcome
