

PRE PRIMARY DEPARTMENT
THEME BASED ACTIVITY (2019-20)
“THANDA THANDA COOL COOL”
(AAM PANNA MAKING ACTIVITY)

DATE: 06.05.19

CLASS: PRE SCHOOL

The tiny tots of Pre Primary I participated in 'Aam panna' making activity with huge excitement and zeal. The class teacher apprised the children about the healthy drinks that we have during 'Summer Season' like mango shake, lemonade, banana shake, squash etc. The activity was followed by mixing of aam panna powder concentrate in the water. Children loved stirring the concentrate in water with the spoon and observing the powder getting dissolved completely in the water. The concept of 'Learning by doing' was thus reinforced. The activity was a huge success as they not only enthusiastically participated in the activity but also learnt about the benefits of this 'magical fruit' mango, which is also called the 'king of the fruits'. The activity also enhanced their verbal skills as the tiny tots discussed about their liking for the mangoes how they like to have mangoes. All the children were excited to make aam panna at home too for their parents and grandparents.

LEARNING OUTCOME:

- Children learnt to work co-operatively with each other.
- It enhanced their sense of touch, smell and taste. They were able to differentiate between sweet, sour and salty tastes.
- They were able to understand the concept of soluble substances.
- Children enjoyed the activity and relished the taste of 'Aam panna'.
