2.2 VISION, MISSION, VALUES, FOCUS & APPROACH

Name of the Academic Resources Segment –wise

Vision Statement

BBPS, Noida is an inclusive school community committed to providing engaging and challenging education opportunities

Mission Statement

We believe each individual is unique and his / her dignity is to be fully respected. We work hard to prepare each student to take up the challenges of an active and responsible participation in society along with its varied cultures and environmental heritage.

Our Values

Commitment, Acceptance, Respect, Excellence, Strength - CARES

Our Focus

The school's mission is to provide excellent educational experiences for all students and to promote respect and tolerance for all is underpinned by the strong core values of: Commitment, Acceptance, Respect, Excellence and Strength. The positive tone and culture within the school is supported by a highly professional staff, together with a hard working school council and community association. Our school is committed to work with children as individuals, adapting programs to their specific needs. A strong emphasis is placed on the development of literacy and numeracy abilities as well as innovative practices in ICT. Our student results are evidence of this commitment. We also offer a broad range of specialist programs that include an excellent Physical Education program, extensive Visual Arts Program, specialist Library Program and emphasis on Sanskrit & French. The School is also widely known for its strong commitment to enhancing curriculum through a specialist Performing Arts Program. The community is also delighted to be entering an exciting new phase, with the development of a Master Plan for new school buildings. These modern facilities will enhance our already stimulating learning environment for our students to complement our innovative teaching and learning.

OUR PEDAGOGICAL VISION

At BBPS Noida we personalize our students' learning to ensure that each student is met at their <u>point of need</u> and actively engaged in co-constructing their individual learning pathway. We pride ourselves on knowing our students as individuals and as learners. We use our knowledge of individual students' interests and their evidence of learning to create relevant and meaning learning engagements.

Our students receive ongoing, specific and meaningful feedback about their progress. They are self-reflective and participate in regular one-on—one conferencing with their teachers to discuss, refine and extend their learning goals. Teachers facilitating students' understanding of curriculum expectations by using whole school documentation that explains curriculum standards in language that can be easily understood by our students.

Our teachers work in collaboration to develop and implement an inquiry driven curriculum. Student grouping is flexible, enabling essential skills and knowledge to be explicitly taught at student's individual point of need.

Teachers share and refine their practice by <u>learning and working in teams</u>. They conduct Action Research relating specifically to the needs of the students whom they teach and provide each other with professional feedback outlining the best practices.

Mutually respectful working relationships exist between staff, parents and the broader community, focussing on supporting and extending student learning through providing opportunities for them to applying their skills and knowledge to real life experiences

Our Teaching Learning Approach

To ensure students are engaged and involved in their learning at BBPS Noida we personalise learning in the following ways:

Personalised learning at BBPS Noida is:

- o Carefully planned curriculum based on each individual child's needs which includes:
- Emphasis on prior knowledge
- stress on individual interests
- focus on individual learning styles
- Identifying the abilities and skills of students helps them identify their future learning goals
- Students and teachers constructing learning pathways together based on two-way feedback conversations.
- Experiential learning as a way of life is not environment or curriculum specific
- Teachers and students hold feedback conversations to discuss data and developmental needs and together they set goals. They discuss ways to reach those goals and the types of evidence that the students will need to produce.
- Scope and sequence needs to be flexible
- Parents can track the progress of their wards via the Parents Portals.
- Student's need to be able to articulate their learning in conferences including video conferences.
- Teachers get to know students as "people" not just "students" and what their interests are.
- Children have choice in terms of regulating behaviour, what/how to learn and how to present their learning.
- How does inquiry learning relate to personalised learning goals?

ICT is used as a tool to personalise learning

	teachers as well as Art, Sports and ICT teachers.
	Ensure dissemination of plan to all teachers and all concerned by June every year.
	Ensure proper implementation of this plan.
	Monitor the progress at least on a monthly basis.
	Reach out to the Board for any training needs.
П	Maintain records of the preparation of the plan, and the progress in the implementation.

	WHOLE SCHOOL							
FIE	MENTS	LEVEL 1	RUBRIC LEVEL 2	LEVEL 3	LEVEL 4			
15151	Personalized Learning	Knowledge and understanding of how students learn is demonstrated by a minority of teachers	Knowledge and understanding of how students learn is emergent in teacher practice. Individual and/or teams of teachers are planning new approaches to teaching and learning.	Knowledge and understanding of how students learn is demonstrated by the majority of teachers. Most teachers have developed and implemented practices that put students at the centre of the learning process.	Knowledge and understanding of how students learn is evident in the practice of all teachers through a broad repertoire of student-centred teaching strategies and assessment methods			
	Persoi Leai	Initial work is being undertaken to gather data on the individual learning styles of students at a year level	Data on the individual learning styles of students has been used to inform planning for the way in which teaching practices can be aligned to the learning needs and goals of individual students.	Pedagogical practice is informed by data and aligned to the learning needs and goals of individual students at certain year levels	Pedagogical practice is aligned to the learning needs and goals of individual students across the whole school			
ARNING	E	Curriculum is usually designed by individual teachers based on the year level and associated subjects.	Teachers plan together to provide consistency of curriculum that reflects the stages of learning and student backgrounds and addresses the needs of particular cohorts of students.	Curriculum planning and practices reflects the achievements of students in relation to the standards for some domains, stages of learning and student backgrounds and perspectives.	All curriculum planning and practices analyses and addresses the full range of learning needs of individual students providing coherence, balance and continuity across all of the domains.			
& LE	Curriculum	Domains are connected in an ad hoc manner when planning learning experiences.	Domains are being combined when planning learning experiences for students.	Many of the domains are strategically integrated creating quality learning experiences for students.	All domains are interwoven in a sophisticated way in the design and delivery of a cohesive curriculum for all students.			
TEACHING & LEARNING	Cm	Curriculum planning and practice for cohorts of students is undertaken as something separated from System Frameworks and the School Strategic Plan.	Any discrepancies between current priorities in the School Strategic Plan and System Frameworks have been identified.	Whole school curriculum planning and practice demonstrates the interconnectedness between the School Strategic Plan, System Frameworks and school improvement.	Whole school curriculum planning and practice is based on the local context and interconnects with the School Strategic Plan and an agenda of continuous school improvement.			
		Students require structured support to develop the necessary knowledge and skills to manage and monitor their learning.	Teachers provide support for students to monitor and manage their learning.	Students have opportunities to monitor and manage their learning through structured support.	All students are equipped to monitor and manage their learning.			
	Assessment	Assessment for teaching (for, of and as learning) is not explicitly planned. Assessment of learning (summative) remains the focus.	Assessment for teaching (for, of and as learning) is being planned with a focus on identification of effective assessment strategies.	Assessment for teaching (for, of and as learning) is planned for at the whole school level and for cohorts of students using a range of data. Parents and students receive regular information on strengths and areas for improvement/future learning.	All teachers use assessment for teaching (for, of and as learning) to provide individualized learning. Learning portfolios enable ongoing information sharing between teachers, students and parents. Evidenced-based valid and consistent judgments are made through moderation.			
ORGAN	VISATIONAL	Current organizational structures all limit flexibility within student groupings and roles and responsibilities of teachers. Student learning and welfare are managed separately.	Current organizational structures are being examined and options are developed and analysed to identify structures that will better support student learning.	Flexible organisational structures are being implemented for aspects of the learning program and/or particular groups of students.	Organizational structures enable learning to happen in a range of places at a range of times through flexible use of people, IT and spaces.			
	UCTURES	Learning spaces are confined to the classroom and there is limited use of ICT to support student learning.	A needs analysis informs future developments of physical and electronic learning environments.	Some spaces have been reorganised to create physical and electronic learning environments that support student learning.	All physical and electronic learning environments have been created that complement diverse student learning.			
	ORMANCE & LOPMENT	Professional learning is fragmented and usually short term.	Protocols have been established to increase the effectiveness of professional learning including the importance of reflection on practice.	Teams of teachers plan for learning opportunities that will meet their needs as a group.	Professional learning in collaborative teams focuses on exploration and sharing of learning and teaching practices to continually improve student learning.			
	LTURE	Professional learning focuses on individual teacher needs rather than agreed school priorities and processes.	School curriculum planning has begun to identify needs and processes for more effective professional learning within the school context.	A schedule of professional learning is established that best meets the needs of all teachers by focusing on their learning needs and grouping teachers accordingly.	The school fosters a culture that values and supports ongoing professional learning, risk taking and focused evaluation			
BUI	IMUNITY LDING & ICIPATION	The leadership team is exploring how to incorporate the System Frameworks in their school and beginning to raise awareness of these initiatives with staff and school community	The leadership team is building its depth of knowledge of the System Frameworks and beginning to structure opportunities for staff and school community to engage with these initiatives to facilitate whole school curriculum planning.	The leadership team has a deep understanding of the System Frameworks and has created structures and processes that support staff and school community to implement these initiatives.	The leadership team has a meta-view of the System Frameworks and provides clear direction for improving student learning that involves all staff, students and relevant aspects of the local community.
