Feedback Received

The ongoing online class is a blessing for class 12 students at this critical moment of the ongoing lockdown. Students are beneficial by the efforts put in by the school staff and management. The syllabus are being kept in track. Though it's a positive move, there are some drawbacks too. Since many people are using their Wi-Fi or mobile internet for working from home, the signal gets slow during the class hours and students miss out the continuity of the class. This is one concern. The other one is, since many students are attending coaching classes, they are also being held online nowadays. The timings sometimes clashes with school hours and children are confused which classes to follow.. The other concern is about the assignments- the work load for students is too high as they need to use mobile for prolonged time for copying them down .This causes reddishness in their eyes. As a parent, it is our concern about their health too. Overall the efforts are good, but stress could be reduced a bit for them , so that the outcome of their performance is high. Thank you,

Deepa, M /o V. Karthik Ramana – 12A

The support extended to us by our school to teach us through the medium of online classes has turned out to be very beneficial for all the students. Initially, we weren't sure whether we would be able to complete our syllabus on time but it's happening and it's perfect. The teachers are very supportive and they stimulate us to work hard everyday. We are able to clear our doubts and complete our work on time. The teachers are providing us with the best material, including previous year papers and notes. Thank you for the encouragement and support.

Lalima- 12 A
