COVID-19 PROJECT

The school is undertaking on COVID-19 to familiarize the students with various aspects related to the spread of this disease and ways to prevent such spread. The school believes the best way to prevention is through information. A lot of news today is about this virus. The students have been given a vocabulary sheet containing words which we often hear in news related to this virus. This would help children appreciate and understand the news. In order to further ingrain this information creatively, a poster-making activity was done. This is also reinforced through daily discussion of 'Covid-19 word of the day'. We hope that this information sharing helps us in keeping safe and secure.
