

Atal Tinkering Lab CollabCAD Course

“Design is where Science and Art break even.”

- *Robin Mathew*

A 15 days course on Computer Aided Design through the ATL Collab CAD : a collaborative network enabled and desktop CAD software system was organized by Atal Innovation Mission. Many students attended this course. It was a great learning experience for the students of Bal Bharati Public School, Noida. They not only enjoyed creating 3 D Designs but also learnt to simulate mechanisms using Collab CAD software.
