

SAVE ENERGY CAMPAIGN **Let us be the Power Savers** **ENVIRONMENT CLUB**

Dear Parents,

It is very common in India for people to consume high amount of electricity to overcome the heat as well as to maintain a comfortable and luxurious lifestyle fully dependent on various electric gadgets. We know all the sources of energy are non-renewable sources mainly coal. Due to our ignorance towards nature and climate change, an energy crisis looms up in some states, including Delhi and Punjab, due to combination of factors such as excess rainfall hitting coal movement and imported coal-based power plants generating less than half of their capacity due to record high rates.

Our electricity bills roar due to over usage and ignorance of some easy green practices that we can easily practice to conserve energy at our end. Making smart choices can help prevent the wastage of energy and conserve our natural resources.

Let us practice the simple habits to overcome the energy crisis.

- Always turn off electric gadgets like laptop, phones television etc. when not in use. Do not put them on standby mode.
- Try to replace bulbs with LED and CFL bulbs. It will save 75% energy and run longer.
- Go on scavenger hunt in your home/workplace to ensure proper insulation of wires.
- Clean your refrigerator coils, filters of air conditioner etc. on regular basis for efficient working and less consumption of energy.
- Use high energy star rating appliances for less consumption of energy.
- Use curtains/blinds to stop heat to enter your rooms. It will keep room cooler.
- Turn off lights and fans if leaving your room.
- Wear light-colored clothes to keep yourself comfortable. It will reduce power consumption to keep yourself cool.
- Go solar and be energy warriors.
- Plant indoor air purifying plants like snake plant, Money Plant Aloe Vera, Tulsi, Areca Palm, Lady Palm, Bamboo Plant, Rubber Plant, Dracaena, Philodendron etc. to use less air purifying machines in rooms.
- Plant trees to keep your surroundings cool and healthy.

We seek your co-operation in our efforts to conserve energy and resources. This will help children to learn and develop habit of saving their resources and use them judiciously.

Together by our smart choices, we can beat the heat and be the power savers.
