INTERNATIONAL DAY FOR DISASTER REDUCTION

(13 OCTOBER 2021)

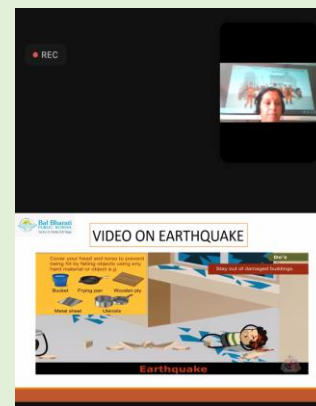

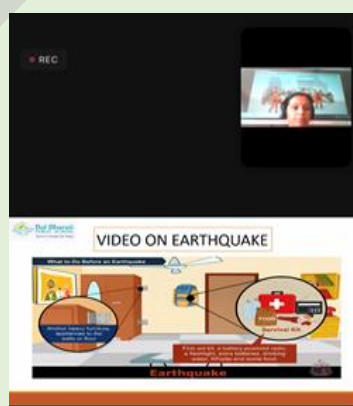

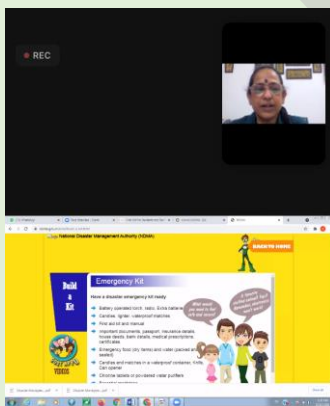

*“You cannot escape the responsibility of tomorrow by evading it day”
Abraham Lincoln*

International Day for Natural Disaster Reduction is observed on October 13, every year to promote a global culture of risk-awareness and disaster reduction and encourages every citizen to take part in building more disaster resilient communities and nation. **'Disaster risk governance'** is the theme of this year when a great number of people have died and fallen ill because of the COVID-19 pandemic. This year's International Day for Disaster Risk Reduction is all about governance.

In continuation of the school's vigorous and on-going endeavours to cope, face the ongoing challenges boldly and effectively, and to create awareness among the students about Disaster Management, various activities like Making a First Aid Kit (class I & II), A skit presentation on fire safety (class III to V), Simulation games on Disaster Management (IV-V), Webinar on 'Disaster Risk Reduction' (For students and staff) were organised.

Students enthusiastically took part in all these activities and learnt about the safety kit and the preparedness tips in case disaster strikes. Students and staff were also shown the NDMA website which has a lot of material and information about managing disaster in the most scientific and interesting manner.

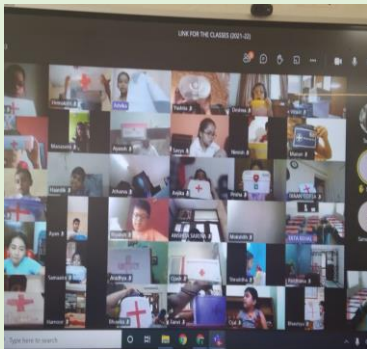

Glimpses of the In house webinar on 'Disaster Risk Reduction'

Screenshots of the skit presentation on fire safety (class III to V)

Screenshots of the 'First Aid Box' making activity being undertaken by the students of the primary wing

Screenshots of the Simulation games on Disaster Management (IV-V)

Wrap up.....

Safety is a common denominator across all aspects of life, hence knowledge should always be shared. It is not a matter of a single individual or an institution, but a matter of entire humanity.
