

'HARITH DIWALI UTSAV'

REPORT

- Under the aegis of Environment Club, an 'Anti cracker campaign and Harith Diwali Utsav' was organized from 25th October to 04th November.
- Harith Diwali digital creatives were circulated to students, parents and staff on broadcast group and to the masses on various social media platforms in order to bring awareness about the ways to celebrate eco-friendly Diwali.
- As a green practice, students of Classes VII and VIII enthusiastically prepared colorful Diwali lanterns to propagate the mission of Harith Diwali.
- A webinar on 'Air Pollution and ways to celebrate Harith Diwali' was organized on 2nd November for Classes VI to IX and XI. The Guest speaker, Mr Avikal Somvanshi, Program Manager, Sustainable urbanization, habitat and clean air, Center for Science and Environment, enlightened everyone on trends of air pollution before and after Diwali. He explained the ill effects of the toxic smoke produced during burning of fire crackers and reasons for cold weather aggravating the pollution. He reiterated that all crackers producing smoke are harmful and that the poisonous pollutants of green crackers still have Barium Nitrate, a toxic chemical banned by Supreme court. He concluded with a positive note that students will certainly take conscious decisions to save environment.
- Special Assembly on Air Pollution and its ill effects as a part of post Diwali session was organized by middle wing in order to spread awareness about ways to curb air pollution by simple green practices.
