BAL SABHA ACTIVITY- CLASS ACTIVITY

GLOW IN THE DARK

DATE- 04.10.2021

CLASS- III

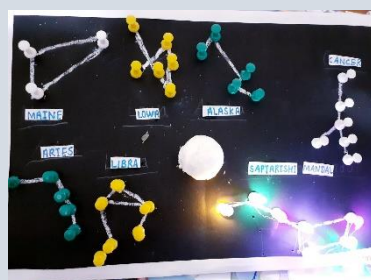

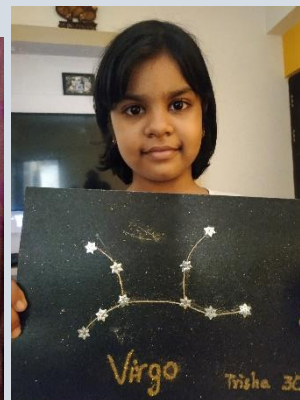

THEME- WORLD SPACE DAY

What are constellations? How do they form a pattern? How are the groups, named? So many questions and a vast enriching discussion about the heavenly bodies and those twinkling stars in the sky, for the young enthusiasts of the class III, was carried out in all sections by the class teacher. The video of the various constellations was shown in the class through the youtube link:

<https://www.youtube.com/watch?v=pqis3gZwVaY&t=417s>

With excitement and wearing creative hats, many students participated in the activity and posted the pictures of their 3D model and a video of explaining it in few lines.

Learning Outcome: Students are now aware about various constellations and zodiac signs that they make. While integrating Art and Craft, students have shown an overwhelming performance by uploading their work on Teams platform. Here are a few glimpses:
