PARENT'S TESTIMONIAL

Water is very precious for every human being to stay healthy. Children being taught about the importance of saving water would help them understand such valuable information from such a young age. Children were taught with a very simple experiment on how to clean water and reuse it. The videos were carefully chosen which made the learning more natural for the child and helped them learn the pivotal role that water plays in sustainability of life. Rain water harvesting is a very simple yet effective technique in collecting and reusing water, and making children aware of such techniques will be useful in helping them learn and generate awareness as they grow up.

Dear ma'am,

The video is very informative because in today's world millions of people die every year from diseases associated with unsafe drinking water, sanitation, and hygiene. So, we should teach our children that used the water wisely and appropriate.

P/O Vihaan Jagota PSB

Introducing children to the topic of save water, climate change and pollution is important to raise the next generation conscious and proactive.

Activities and songs related to save water during assembly and academic sessions encouraged kids to understand the save water concepts very easily that my kid started imbibing it in her daily habits. Thanks, you once again BBPS teachers.

P/O Saanvi Yadav PSC

Activities conducted related to SDG 6 goal helped my child understand the importance of clean water and what would be the disastrous results if we won't have access to clean water. Also, it has taught them how important it is to keep our rivers clean.

P/O Jaisvi Thakur PS D

Every month topics are taken up by the teachers to sensitize kids about social issues and this month's topic- clean water and sanitation has enlightened kids about importance of clean water, uses, rainwater harvesting etc. This shows how well the online classes are being conducted by the teachers as information is imparted to the kids in layman language. The efforts of teachers and students' enthusiasm is evident from the online classes and assemblies conducted. Thank you

P/O Veehant Chakraborty PSE

Children who learn about safe water and sanitation and hygiene habits at school can reinforce positive life-long behaviours in their homes and communities.

I would like to thank all the teachers for all the efforts they are putting together to teach our children that develops creative skills, social skills, communication skills and language skills. Aarvi has learnt a lot about importance, uses of clean water and sanitation in a fun way..A special thanks to Payal Ma'am who is always available whenever I need your help.

Regards,
