**Dear Parents,
Warm Greetings!**

The Summer Vacations are round the corner. Keeping our learning curve on, is a challenge that we have learnt to overcome in the previous year. With high spirits and enthusiasm, we aim to keep ourselves positive and happy. Amidst the ongoing challenges, this year we have planned some unique activities for our children to learn while playing. We have planned to teach our little learners the value of food and sharing. This topic is chosen with the motive of encouraging the students to eat their food completely and take only the portions that they intend to finish.

Each student is expected to undertake all the activities assigned in the holiday homework.

The assigned work is to be done as per the instructions given at the end of each HHW activity.

This project is an amalgamation of simple yet thoughtfully planned activities which promote critical and creative thinking skills amongst young learners. It is an integrated project with scholastic and co-scholastic activities, targeting competency-based learning.
