SESSION (2022-23)
DATE-14.10.2022

CONSTELLATION TRAY
(SCIENTIFIC TEMPERAMENT ACTIVITY)

CLASSES- PRE SCHOOL & PRE PRIMARY

The activity 'Constellation Tray' was organised for the children of Pre School and Pre Primary to enhance their knowledge about the stars and different types of constellations which are visible during the night sky. The class teacher apprised the children about the planet Earth and the stars. A video was shown to the children (on the smart panel) showcasing different constellations like Ursa Major, Ursa Minor, Gemini, Taurus and many more. The children were super excited to learn about the wonders of the sky. After watching the video showcasing different constellations, the children were guided to form constellations on paper using star stickons as a follow up activity.

.They were not only motivated to look up and experience the beauty of the night sky but were also encouraged to locate different constellations. The 'Scientific Temperament' activity not only enhanced their knowledge but also gave wings to their imagination to create imaginary constellations of their own.
