

REPORT ON INTERNATIONAL COLLABORATION WITH RUSSIA

Today, in the 21st century we observe a huge growth in classroom technology, and with it, the introduction of new learning methodologies. One example, which focuses on holistic development of learners, is collaborative learning. The best learning happens when children are actively involved in collaboration and when the collaboration is with another community, country and students of other culture, the benefits from the learning multifold. To reap those benefits, Bal Bharati Public School, Noida collaborated with Municipal Autonomous Educational Institution, “Gymnasium No. 76, Chelyabinsk”, Russia on **9th September, 2022** for the second time.

It's a simple idea; We all do better when we work together.

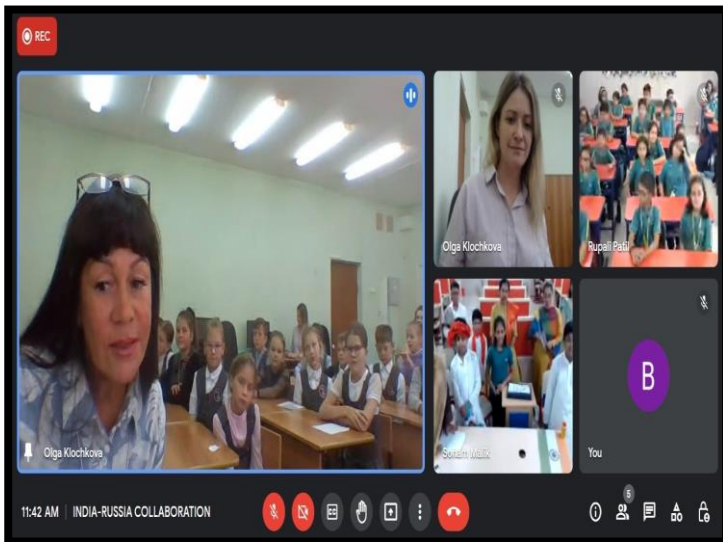

The session commenced with words of appreciation by **Ms.Irina Deyeva**, Principal Madam of the Russian school followed by the introduction and presentation by the Russian students wherein they shared about their favourite food, hobby, sports, and dance and asked the same questions from our students in order to establish a great rapport with each other. Our young erudites from India also participated enthusiastically and were appreciative of hearing different opinions and learning more about different cultures.

To enlighten our Russian counterpart, our students presented the amazing facts about India which put our partner country in awe. The enthusiastic learners also presented different shades of our country which covered the domains of climate, cuisine, animals, clothing, and music of our country. The musical performance on the traditional song “Saavan”, meaning Monsoons made sure that the students had a gala time whilst grooving to the beats and listening to the mellifluous voices.

Glimpses Of The Successful Collaboration!

It is Rain that grows Flowers, and Music that makes them Bloom!

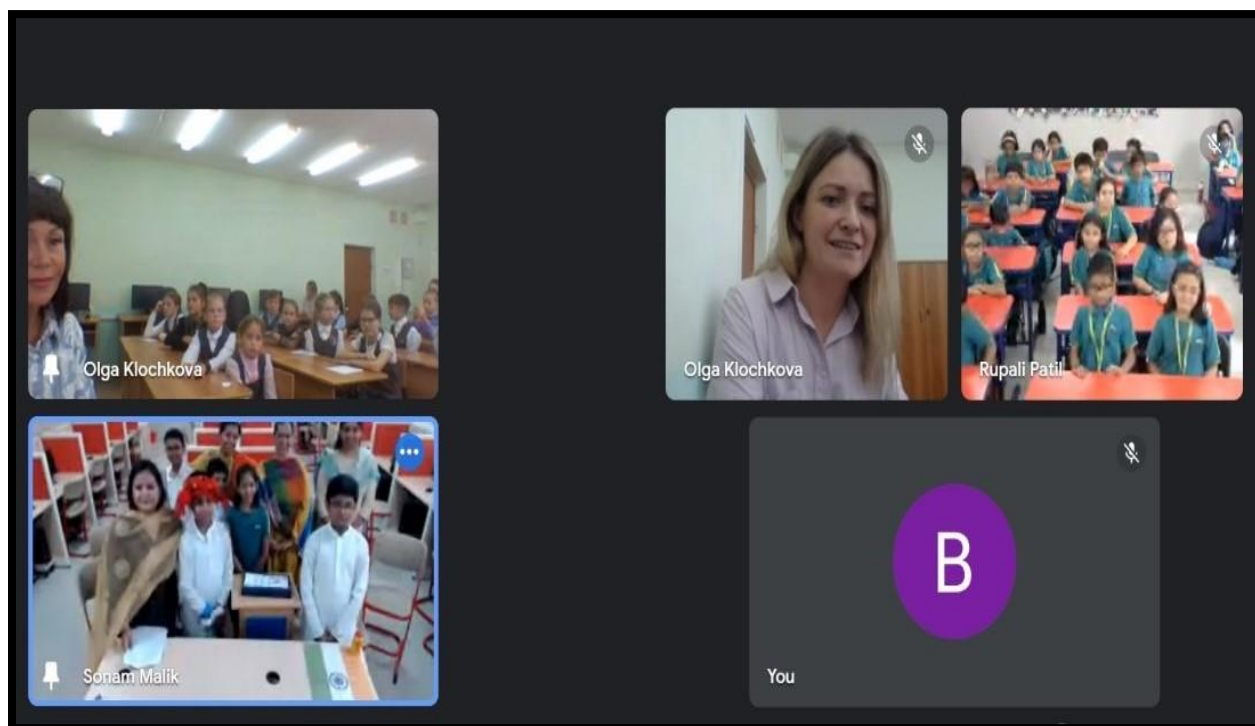

ENTHUSIASTIC STUDENTS COLLABORATING AND LEARNING!

The session ended with the vote of thanks as the students worked together for an effective collaboration and reached a common goal, of engaging themselves to learn more.

TESTIMONIAL

The benign words of Ms. Olga Klochkova- “Our kids are very happy and they offer to continue this collaboration. They like your school a lot. It is very big and beautiful, with really good classes and laboratories”, proved that the collaboration was indeed a success as the motive of strengthening the bond between the two schools and the countries was sufficed.

Till We Meet Again! Dasvidaniya (Goodbye)
