# MATHEMATICS INTEGRATED WITH SPORTS

*Although not always realized, mathematics plays a very important role in sports. Whether discussing a player's statistics, a coach's formula for drafting a team of certain players, or even a judge's score for a particular athlete, mathematics is involved.*

**Getting to know about our Indian Cricket Team's all time top players and comparing their total runs taken till date is definitely an interesting and knowledgeable thing to do.**

**Use the stats of Top 5 Indian cricketers from the following link, create the data in tabular form in descending order and find out how much score a cricketer would need to reach the milestone of 20,000 runs !!!!**

**Use the given link for reference-**
