

## Workshop on "ADOBE EXPRESS IN EDUCATION"

The training was held on 20 May 2024 in Middle and Senior Computer Lab. Ms Duhita Parmar, Design Head, Adobe India conducted training.

### **Title: Exploring different tools in Education**

The workshop aimed to familiarize teachers with the concepts of Generative AI and to explore the various features of Adobe Express to create attractive web content required for classroom teaching.

#### **1. Understanding the Difference between Website and Webpage:**

During the workshop, the trainers initiated the session by enquiring about the fundamental difference between a website and a webpage. They provided clear explanations, emphasizing that a website is a collection of interconnected webpages, while a webpage is a single page within a website.

#### **2. Signing in to Adobe Express:**

The trainers instructed all participants to sign in to Adobe Express using their respective IDs. This step was essential to gain access to the platform and utilize its wide array of web design tools.

#### **3. Guided Webpage Design:**

The main segment of the workshop was dedicated to the practical aspect of designing a webpage. The trainers expertly guided us through the various options and features available on Adobe Express that could be employed to enhance the visual appeal and functionality of our webpages.

#### **4. Exploring Adobe Features:**

The trainers introduced us to the diverse features offered by Adobe Express, which included customizable templates, Generative AI, AI based worksheets, teaching learning content and animations. Participants were encouraged to experiment with these tools to personalize their webpages and showcase their creativity.

#### **Conclusion:**

The web design workshop conducted by our trainers proved to be an enriching experience for all teachers. The teachers have submitted three assignments in google forms. It not only clarified the distinction between websites and webpages but also empowered us with the knowledge of using Adobe Express to create attractive and engaging web content. Armed with these newfound skills, we look forward to incorporating web design elements in our teaching practices to enrich the learning experiences of our students
