

## REPORT ON CAREER COUNSELLING WORKSHOP

**Date:** 04 May 2024

**Venue:** School Auditorium

**Attended By:** Class XI and XII Teachers

**Resource Person:** Mr Ritesh Jain, VPL and HM Sr.

**Profile of the Speaker:** Career Counselor and Strategist at PRATHAM

### CONTENT OF THE WORKSHOP:

A career counselling workshop was held for the Teachers of class XI & XII. The theme of the workshop was to educate the Teachers on the “NEW AGE CAREERS” that were available for the students. The workshop gave insight into the various career opportunities that the students could opt for irrespective of the stream that they have chosen. The session started with an introduction by the vice-head girl welcoming Mr Ritesh Jain the speaker of the session. The session provided us with the upcoming career options available to the students and also the ways and means to reach there. The workshop gave us insight into career options like data sciences, cinematography, banking careers, supply chain management, forensic computer analyst and so on. Introduction of the cost-efficient courses in different sectors was also discussed by the speaker, it allowed the students to think far and beyond and become aware of the different ways they could achieve their goals.

Through the workshop Mr Ritesh took the teachers through different topics, explaining the current situation and job opportunities of different streams and subjects. Knowledge about the various Olympiads and competitive exams was shared with the teachers, this would enable the students to prepare themselves beforehand while they apply for admissions in India and abroad.

Since the workshop was not divided based on stream sir took up different subjects and explained how students are not restricted but have the freedom to choose the subjects as per their passion towards the subjects. He explained how the students of class XII are pushed into some particular fields like engineering and science not realising the plethora of courses available outside this realm, he discussed the scholarships that universities like the University of Wisconsin, University of Waterloo, and other Universities provided to the students. He discussed some specific courses like Mathematics and the colleges within India and abroad that offer this course and the eligibility for the same.
