

REPORT
BAL SABHA ACTIVITY (2024-25)
OBSERVING WORLD FOOD DAY

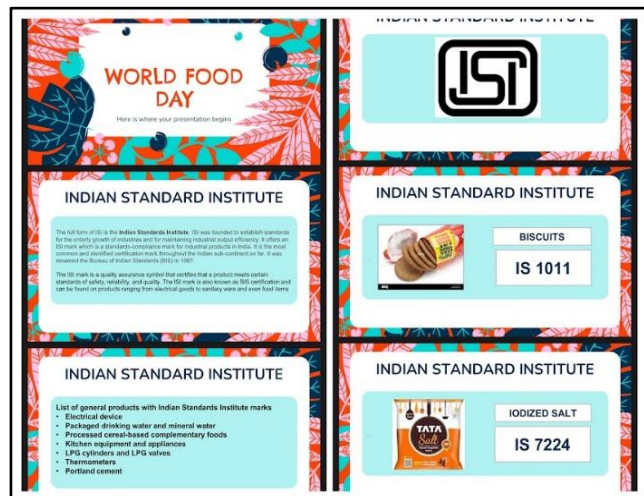

Date of the activity: 09.10.2024

Venue: Respective Classrooms

In-charges: Class teachers of class I and II

Purpose: Students will learn that ISI Mark certifies that a product conforms to an Indian Standard Institute (ISI) developed by the Bureau of Indian Standards (BIS), the national standards body of India. Students will be able to identify ISI-certified products and understand their importance in food safety.

Highlights of the activity: As part of the World Food Day celebrations, a special activity was conducted for grade 2 students to introduce them to the concept of quality control, with a focus on the Indian Standards Institute (ISI) certification. A PowerPoint presentation was shown, highlighting the importance of food safety and quality standards in ensuring that the food we eat is safe and of high quality.

The session began with a brief introduction to World Food Day and its significance, followed by an explanation of the role of ISI in maintaining quality standards for various food products. The students were introduced to the ISI mark, commonly found on packaged goods, and learned how it guarantees that the product has met specific safety and quality requirements.

The presentation used engaging visuals and examples, which helped the young students understand the importance of quality control in a simple and fun way. They were encouraged to ask questions and share their own experiences with food packaging and safety at home.

The students actively participated throughout the session. They were especially enthusiastic when identifying ISI-marked products from pictures and real-life examples provided during the presentation. Some students also shared stories about how they had seen these marks at home but hadn't understood their meaning until now.

The session concluded with a small quiz to reinforce what they had learned. The students showed great interest in the topic and demonstrated a good understanding of the importance of food safety and quality standards.

Overall, the activity was successful in not only raising awareness about food safety and ISI certification but also in engaging the students in a meaningful discussion about the importance of consuming safe and high-quality food products.

In conclusion, the activity successfully raised awareness about the ISI mark and food safety, with students showing enthusiasm in learning how to identify certified products and understanding the importance of quality control in the food they eat.
