Topics - Factual Passage ,Integrated Grammar, L-The Beggar (Moments), Kathmandu (Beehive),Vocabulary Enhancement

Q1. Read the passage carefully and answer the questions that follow:

The vipers are a family of poisonous snakes. In fact some of the deadliest snakes known to us belong to this family. Vipers mainly live in wet places, rain forests and small caves inside mountains.

Rattlesnake, water moccasin and copperhead are examples of some dangerous vipers. All of these snakes are found in the United States of America. The bushmaster and the fer-de-lance are found in South America and the puff-adder is found in Africa. Vipers have triangular heads, short tails and thick bodies. They have fangs in their upper jaws to inject poison into the body of their victim. When snakes bite, the muscles around their poison sacs contract causing the poison to squirt out through their hollow fangs. The sacs are located behind their eyes. One bite will inject about half a teaspoon of poison into the victim's body. Vipers mainly eat small mammals, amphibians, nestlings and lizards. Their venom contains more than a dozen toxic compounds. Many members of the viper family are small and their bite is not fatal. Some studies have shown that vipers can survive for up to one year without eating. And according to some folklore, the touch of the viper snake's tongue has the power to heal a person.

Vipers tend to have a lot of babies. They are classified as ovoviviparous. That means the female snakes produce eggs but do not lay them. Instead they hatch the eggs inside their body and give birth to live young. At a time, the female may give birth to up to 10 baby snakes. Baby snakes are completely independent of their mother when they are born and they leave the area of their birth within days of hatching. There are mainly two types of vipers – the pit vipers and the true vipers. The pit vipers live in Asia and the Americas. They have a small hollow in the side of their head just below the eye. This small pit has a special nerve or a temperature sensing organism. This nerve helps the viper to find its warm-blooded prey. True vipers don't have this nerve and hence they have to rely on their sense of smell to find their prey. Vipers do not normally attack unless they are disturbed or hungry. Still it makes sense to stay away from them.

A. Complete the following statements based on your reading of the above passage

1. Vipers are classified as ovoviviparous because ____
2. Pit vipers are so called because ____
3. How do snakes inject venom into their victim's body?

रचनात्मक-लेखन :- अनौपचारिक पत्र, संवाद-लेखन, चित्र-वर्णन

1 - गद्यांश को ध्यानपूर्वक पढ़िए और उस पर आधारित प्रश्नों के उत्तर दीजिए।

आज पूरी दुनिया में व्यापक जल संकट है। एक तरफ हिमनद (ग्लेशियर) का पिघलना और दूसरी तरफ बाढ़-सुखाड़ का बढ़ना आम होता जा रहा है। आमतौर पर नदियों में पानी घट रहा है। हिमनद जब पिघलता है, तो ऊपर नदियों के उद्गम के पास ही लोग उसका उपयोग कर लेते हैं। हिमनदों के पिघलने के कारण हमारे समुद्रों पर भी उसका दुष्प्रभाव पड़ रहा है। नदियों में जो सतत प्रवाह है, उसमें भी धीरे-धीरे संकट बढ़ता जा रहा है। जल स्रोत संकट में आते जा रहे हैं। यह जो जल-स्रोत का संकट है, उससे बचने के उपाय भी बहुत साफ़ हैं। जहाँ हिमनद पिघल रहे हैं, उनके आस-पास जंगलों का होना जरूरी है। जंगल नहीं होते हैं, तो सूरज से आने वाली लाल गर्मी वहाँ का तापमान बढ़ा देती है और उस तापमान के चलते हिमनद और तेज़ी से पिघलकर नीचे आने लगते हैं। जब वहाँ जंगल होते हैं, तो सूरज से आने वाली गर्मी से धरती तपती नहीं है, उसे बुखार नहीं चढ़ता। हिमनदों के आस-पास के इलाकों में हरियाली बढ़ाना अब बहुत जरूरी है। इन इलाकों में होने वाले कटाव को भी रोकना चाहिए।

आज नदियों और तालाबों की स्थिति भी अच्छी नहीं है। अधिकतर नदियाँ सूख गई हैं और जो बची हैं, वे मैला ढोनेवाली मालगाड़ी बन गई हैं। जिस देश में नदियाँ सूखती हैं, वहाँ की सभ्यता भी सूखने लगती है। नदियों का हमारी सभ्यताओं और जीवन से गहरा रिश्ता है।

(i) उपर्युक्त गद्यांश में लेखक की चिंता का विषय है-

- | | |
|--------------------------|--------------------|
| (A) पिघलते हिमनद | (B) घटते वन प्रदेश |
| (C) प्रदूषित होती नदियाँ | (D) बढ़ता जल संकट |

(ii) गद्यांश के आधार पर ग्लेशियरों के पिघलने का कारण है -

- (A) धरती का बढ़ता तापमान (B) बढ़ती प्राकृतिक आपदाएँ
(C) नदियों का सूख जाना (D) जल स्रोत का बढ़ता संकट

(iii) उसे 'बुखार नहीं चढ़ता' से अभिप्राय है-

- (A) उसकी सेहत खराब नहीं होती । (B) मौसम का मिज़ाज नहीं बिगड़ता ।
(C) धरती का तापमान नहीं बढ़ता । (D) वह हरी-भरी बनी रहती है।

(iv) नदियों और सभ्यता के बीच के रिश्ते के विषय में क्या कहा गया है?

(v) 'दो तिहाई नदियाँ मैला ढोनेवाली मालगाड़ी बन गई हैं' - - पंक्ति का क्या आशय है?

2. निम्नलिखित प्रश्नों के उत्तर दीजिए —

- (i) स्रोत के आधार पर शब्द के कितने भेद हैं?
(ii) अनुस्वार की ध्वनि नाक से निकलती है। जिसका मानक चिह्न ----- है।
(iii) 'सङ्गति' में उचित स्थान पर अनुस्वार लगाकर मानक रूप लिखिए -

Multiple choice questions

- In fig. AOB is a diameter of the circle and $AC = BC$ the $\angle CAB$ is equal to:
 - 30°
 - 60°
 - 45°
 - 90°
- In fig. AB and CD are two equal chords of a circle with centre O. OP and OQ are perpendiculars on chords AB and CD respectively. If $\angle POQ = 150^\circ$ then $\angle APQ$ is equal to
 - 30°
 - 15°
 - 75°
 - 60°
- The radius of a circle is 13cm and the length of one of its chords is 10cm. The distance of the chord from the centre is
 - 11.5 cm
 - 69 cm
 - 12 cm
 - 23 cm
- In fig. if $\angle ABC = 20^\circ$, then $\angle AOC$ is equal to
 - 20°
 - 60°
 - 40°
 - 10°
- If $AB = 12\text{cm}$, $BC = 16\text{cm}$ and AB is perpendicular to BC, then the radius of the circle passing through the point A, B and C is:
 - 6cm
 - 8cm
 - 10 cm
 - 12 cm
- AD is a diameter of a circle and AB is a chord. If $AD = 34\text{ cm}$, $AB = 30\text{ cm}$ the distance of AB from the centre of the circle is:
 - 17 cm
 - 15cm
 - 4cm
 - 8 cm

Answer the following questions

7. Find the missing variables in the given figures:

(a)

(b)

(c)

(d)

11. In the given figure A, B, C and D, E, F are two sets of collinear points. Prove that $AD \parallel CF$.

Section D (4 Marks)

12. During a practical activity in math lab students were using circular geo board. The angle subtended by an arc at the center is $(2a+50^\circ)$. Ram calculated $\angle BAC$ as $(a+25^\circ)$.
- Is he finding correct? Justify it.
 - Find $\angle BAC$ if $a = 30^\circ$
 - What will be the value of $\angle BOC$ for $a = 15^\circ$?
 - If $a = 30^\circ$ then find the measure of Reflex $\angle BOC$

13. AB and CD are two parallel chords of a circle which are on opposite sides of the center O such that $AB = 10\text{cm}$, $CD = 24\text{cm}$ and the distance between AB and CD is 17 cm. Find the radius of the circle. (fig.8)

14. In fig.9, O is the center of the circle, $\angle BCO = 30^\circ$ Find x and y.

15. In fig.10, O is the center of the circle, $BD = OD$ and $CD \perp AB$, Find $\angle CAB$.

TOPIC: ANIMAL HUSBANDRY

HIGHER ORDER THINKING SKILLS (HOTS) - Multiple Choice Questions (MCQs)

1. Which of the following is not a part of animal husbandry?
 - a) Breeding of livestock
 - b) Growing crops
 - c) Dairy farming
 - d) Poultry farming
 2. Cross-breeding is done in animal husbandry to:
 - a) Improve disease resistance
 - b) Reduce milk production
 - c) Lower body weight of animals
 - d) Increase dependency on imported breeds
 3. The method of rearing fish commercially in tanks and ponds is called:
 - a) Pisciculture
 - b) Apiculture
 - c) Sericulture
 - d) Horticulture
 4. Which one of the following animals is primarily used for wool production?
 - a) Cow
 - b) Goat
 - c) Sheep
 - d) Buffalo
 5. Artificial insemination in cattle is preferred because:
 - a) It is expensive
 - b) It reduces the chance of diseases
 - c) It does not improve breeds
 - d) It leads to less milk production
-

SHORT ANSWER QUESTIONS (3 Marks Each)

1. Explain two ways in which animal husbandry contributes to the economy of a country.
 2. How does cross-breeding help in improving livestock? Provide an example.
 3. Differentiate between pisciculture and apiculture with examples.
 4. Why is proper shelter important in animal husbandry?
 5. Write a short note on the role of cooperatives in dairy farming.
-

LONG ANSWER QUESTIONS (5 Marks Each)

1. Describe the management practices necessary for dairy farming. Explain how these practices ensure better milk production.
 2. Discuss the process and importance of poultry farming. Highlight the key points to be kept in mind for its successful management.
 3. What is sericulture? Explain its economic importance in rural areas of India.
 4. Explain the different steps involved in the production of high-yielding breeds of cattle. How do these methods help in meeting human needs?
 5. Suggest and explain ways to improve animal husbandry practices to meet the increasing demand for food.
-

CRITICAL THINKING CHALLENGE

Case Study:

A farmer in a rural area has limited resources and wants to start animal husbandry as a source of livelihood. Considering the local climate and availability of fodder, the farmer has the option of rearing either goats or poultry.

- Analyze the situation and suggest which option would be more suitable.
 - Justify your answer with relevant points on cost, maintenance, and profitability.

- 1. Who proposed the law of constant proportions?**
 - a) John Dalton
 - b) Joseph Proust
 - c) Ernest Rutherford
 - d) J.J. Thomson
- 2. The smallest particle of an element that can take part in a chemical reaction is:**
 - a) Molecule
 - b) Atom
 - c) Ion
 - d) Compound
- 3. The formula unit mass of NaCl is:**
 - a) 23 u
 - b) 35.5 u
 - c) 58.5 u
 - d) 59.5 u
- 4. Hydrogen and oxygen combine to form water in the ratio:**
 - a) 2:1 by weight
 - b) 1:8 by weight
 - c) 1:2 by weight
 - d) 2:16 by weight
- 5. What is the valency of oxygen in H₂O?**
 - a) 1
 - b) 2
 - c) 3
 - d) 4
- 6. Identify the diatomic molecule from the following:**
 - a) O₂
 - b) NaCl
 - c) CO₂
 - d) NH₃
- 7. Which of the following statements about atoms is incorrect?**
 - a) Atoms are indivisible.
 - b) Atoms of the same element have identical masses.

- c) Atoms combine in fixed whole-number ratios to form compounds.
d) Atoms can be created and destroyed during chemical reactions.
8. **What is the correct formula for calcium hydroxide?**
a) $\text{Ca}(\text{OH})_2$
b) CaH_2
c) Ca_2OH
d) $\text{Ca}(\text{OH})$
9. **The ratio by mass of hydrogen and oxygen in water is:**
a) 2:1

a) Neutrons
b) Protons
c) Electrons
d) Ions
13. **Which of the following is true about Rutherford's atomic model?**
a) The nucleus is positively charged.
b) Electrons revolve around the nucleus in circular orbits.
c) Most of the atom is empty space.
d) All of the above
14. **The charge of a neutron is:**
a) Positive
b) Negative
c) Neutral
d) Double positive
15. **The number of protons in an atom determines its:**
a) Mass number

- b) Atomic number
- c) Valency
- d) Neutron number

16. **Bohr's atomic model suggests that:**

- a) Electrons move randomly around the nucleus.
- b) Electrons revolve in fixed energy levels.
- c) The nucleus contains only protons.
- d) Electrons and protons are present in the nucleus.

17. **The nucleus of an atom contains:**

- a) Protons and electrons
- b) Neutrons and electrons
- c) Protons and neutrons
- d) Protons, neutrons, and electrons

18. **The first shell of an atom can accommodate a maximum of:**

- a) 2 electrons
- b) 4 electrons
- c) 8 electrons
- d) 18 electrons

19. **What is the atomic number of an element with 11 protons?**

- a) 11
- b) 22
- c) 1
- d) 10

20. **Who discovered the neutron?**

- a) Rutherford
- b) Bohr
- c) Thomson
- d) Chadwick

21. **Which of the following represents a neutral atom?**

- a) Protons > Electrons
- b) Protons = Electrons
- c) Protons < Electrons
- d) None of these

22. **What is the maximum number of electrons that can be accommodated in the second shell?**

- a) 2
- b) 4
- c) 8
- d) 16

23. **In Rutherford's gold foil experiment, most alpha particles:**

- a) Passed through without deflection
- b) Got deflected

- c) Bounced back
- d) Were absorbed

24. **The valency of an element depends on its:**

- a) Atomic number
- b) Number of electrons in the outermost shell
- c) Mass number
- d) Number of neutrons

25. **The charge of a neutron is:**

- a) Positive
- b) Negative
- c) Neutral
- d) Double positive

COMPETANCY BASED QUESTIONS

- Knowledge and Understanding

Q26. Explain how Rutherford's alpha particle scattering experiment led to the discovery of the nucleus.

- Application Based

Q27. Using the Bohr model of the atom, calculate the number of electrons in the all four orbit of an atom.

- Critical Thinking

Q28. Compare the key differences between the Thomson model and the Rutherford model of the atom. What limitations of the Thomson model were addressed by Rutherford?

Q5. Draw a curve showing density or pressure variations with respect to distance for a disturbance produced by sound. Mark the following

i) Amplitude of the wave

ii) What is the frequency of the wave drawn by you.

iii) compression and **iv)** rarefaction on this curve. Q6. What

is the wavelength in the given curve (in terms of A,B,C,D,E)

Q7. What is relation between time period and frequency?

Q8. Name the principle on which a stethoscope works. Draw a diagram only to explain its working.

Q9. For hearing the loudest ticking sound heard by the ear, find the angle r in the figure.

Q10. Which wave characteristics determine the loudness and pitch of sound?

Q11. Figure shows a loudspeaker cone oscillating to produce sound waves:

Answer the following questions based on the above diagram

- a) As the sound wave passes a point, it produces regions of higher and lower pressure. State the names of these regions.
- b) State the effect on the loudness and pitch of the sound from the loudspeaker when the amplitude increases but the frequency of the sound stays the same.
- c) State the effect on the loudness and pitch of the sound from the loudspeaker when the amplitude stays the same but the frequency increases.

Q12. The speed of sound _____ on a hotter day. Give reason for the statement.

Q13. A sound wave travels at a speed of 339 ms^{-1} . If its wavelength is 1.5 cm, what is the frequency of the wave? Will it be audible?

Q14. A powerful sound signal sent from a ship is received again after 2.4 seconds. How deep is the ocean bottom? (Speed of sound in water = 1,500 m/s)

Q15. (a) Represent graphically by two separate diagrams in each case

- (i) Two sound waves having the same amplitude but different frequencies.
- (ii) Two sound waves having the same frequency but different amplitudes.
- (iii) Two sound waves having different amplitudes and also different wave lengths.

(b) If velocity of sound in air is 340 m/s, calculate

- (i) wavelength when frequency is 256 Hz.
- (ii) frequency when wavelength is 0.85 m

Poverty Ratio in Selected Indian States, (As per 2011 Census)

Answer the following questions based on the above graph:

Q1 Identify the three states with Highest poverty ratio.

Q2 Identify the three states with Lowest poverty ratio.

Q3 Create a comparative analysis based on the two aspects mentioned above and explain the reasons behind the regions with the highest and lowest poverty ratios.

CASE BASED STUDY:

Read the following passage carefully and answer the questions given below it. Certain words have been printed in the bold to help you locate them while answering some of the questions.

Story of Sakal

There were two friends Vilas and Sakal living in the same village Semapur. Sakal was a twelve- year-old boy. His mother Sheela looked after domestic chores. His father Buta Chaudhary worked in an agricultural field. Sakal helped his mother with domestic chores. He also looked after his younger brother Jeetu and sister Seetu. His uncle Shyam had passed the matriculation examination, but was sitting idle in the house as he had no job. Buta and Sheela were eager to teach Sakal.

They forced him to join the village school which he soon joined. He started studying and completed his higher secondary examination. His father persuaded him to continue his studies. He raised a loan for Sakal to study a vocational course in computers. Sakal was meritorious and interested in studies from the beginning. With great vigor and enthusiasm, he completed his course. After some time, he got a job in a private firm. He even designed a new kind of software. This software helped him increase the sale of the firm. His boss acknowledged his services and rewarded him with a promotion.

Story of Vilas

Vilas was an eleven-year-old boy residing in the same village where Sakal lived. Vilas's father Mahesh was a fisherman. His father passed away when he was only two years old. His mother Geeta sold fish to earn money to feed the family. She bought fish from the landowner's pond and sold it in the nearby mandi. She could earn only Rs 150 a day by selling fish. Vilas became a patient of arthritis. His mother could not afford to take him to the doctor. He could not go to school either. He was not interested in studies. He helped his mother in cooking and also looked after his younger brother Mohan. After some time, his mother fell sick and there was no one to look after her. There was no one in the family to support them. Vilas, too, was forced to sell fish in the same village. He, like his mother, earned only a meager income.

Q.1 Do you notice any difference between the two friends? What are those?

Q2. Explain in your words how the living conditions of Sakal and Vilas effected their future and their Contribution to the economy.

Q.3 Two statements are given below as Assertion (A) and Reasoning (R). Read the statement and choose the most appropriate option.

Assertion (A): Buffer Stock is the stock of the foodgrains, namely wheat and rice, procured by the government. Reasoning (R): Buffer Stock is maintained by the Life Corporation of India (FCI).

- A) Both Assertion and Reason are true and Reason is the correct explanation of Assertion.
- B) Both Assertion and Reason are true but Reason is NOT the correct explanation of Assertion.
- C) Assertion is true but Reason is false.
- D) Assertion is false but Reason is true.
- E) Both Assertion and Reason are false

Q.4 Two statements are given below as Assertion (A) and Reason (R). Read the statement and choose the most appropriate option.

Assertion (A): The quality of the population decides the growth rate of the country. Reason (R): The quality of population depends upon the income of people.

- A) Both Assertion and Reason are true and Reason is the correct explanation of Assertion.
- B) Both Assertion and Reason are true but Reason is NOT the correct explanation of Assertion.
- C) Assertion is true but Reason is false.
- D) Assertion is false but Reason is true.
- E) Both Assertion and Reason are false

Q.5 Two statements are given below as Assertion (A) and Reason (R). Read the statement and choose the most appropriate option:

Assertion (A): Contemporary perspectives on poverty are primarily grounded in economic criteria. **Reason (R):** This includes elements like education, health, employment prospects, access to essential services, and the phenomenon of social exclusion.

- A) Both Assertion and Reason are true and Reason is the correct explanation of Assertion.
- B) Both Assertion and Reason are true but Reason is NOT the correct explanation of Assertion.
- C) Assertion is true but Reason is false.
- D) Assertion is false but Reason is true.
- E) Both Assertion and Reason are false

Q.6. Two statements are given below as Assertion (A) and Reasoning (R). Read the statement and choose the most appropriate option.

Assertion (A): Food security means availability, accessibility and affordability of food to all people at all times. Reasoning (R): Food security also depends on the Public Distribution System (PDS).

- A) Both Assertion and Reason are true and Reason is the correct explanation of Assertion.
- B) Both Assertion and Reason are true but Reason is NOT the correct explanation of Assertion.
- C) Assertion is true but Reason is false.
- D) Assertion is false but Reason is true.
- E) Both Assertion and Reason are false

Q.7 Two statements are given below as Assertion (A) and Reason (R). Read the statement and choose the most appropriate option.

Assertion (A): Seasonal unemployment is prevalent in agriculture.

Reason (R): Seasonal unemployment occurs because of the cyclical nature of farming activities.

- A) Both Assertion and Reason are true and Reason is the correct explanation of Assertion.
- B) Both Assertion and Reason are true but Reason is NOT the correct explanation of Assertion.

- C) Assertion is true but Reason is false.
- D) Assertion is false but Reason is true.
- E) Both Assertion and Reason are false

 - D) A study of geographical features of a region

2. As per the 2024 Census, which of the following states of India is most densely populated?
 - A) West Bengal B) Kerala C) Uttar Pradesh D) Bihar

3. An indicator of Socio-Economic development in a country is_____
 - a) Literacy b) Wealth c) Sex composition d) None of these

4. Which state in India has the highest literacy rate as of 2024?
 - A) Tamil Nadu B) Goa C) Kerala D) Himachal Pradesh

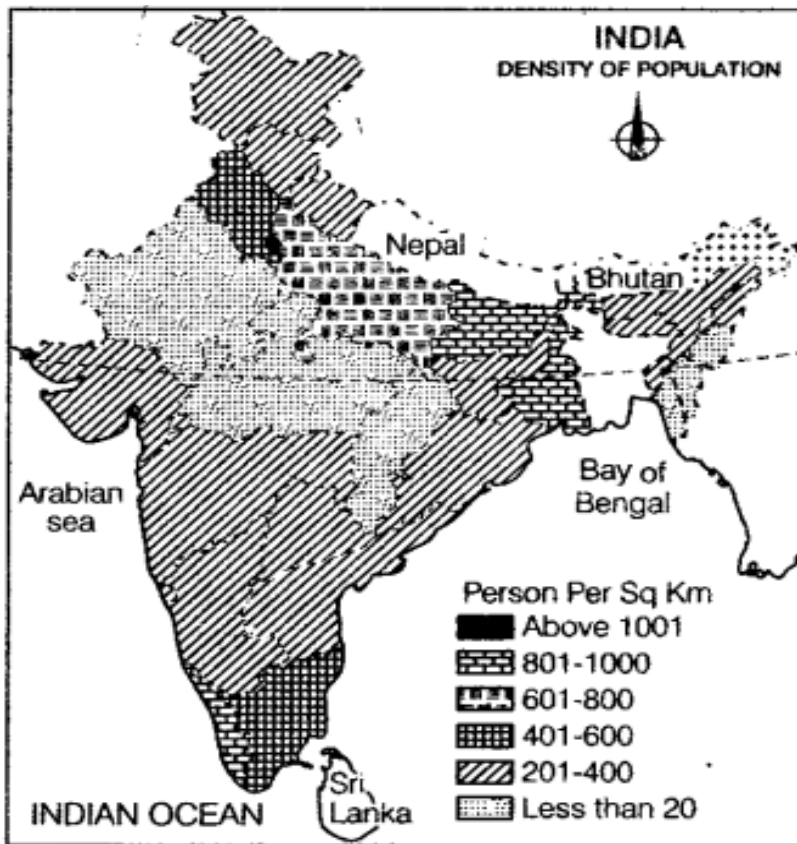

5. What is the term for the movement of people within a country's borders?
 - a) Emigration b) Immigration c) Internal migration
 - d) International migration

6. What is the term for the number of years it takes a population to double in size at the current growth rate?
 - a) Doubling time b) Life expectancy c) Replacement level d) Demographic transition

7. The age, sex, education level, and ethnicity of a population are examples of:
 - a) Population density b) Population distribution
 - c) Population composition d) Population growth

8. Which of the following is NOT a factor that influences population distribution?
 - a) Climate b) Landforms c) Economic development d) Time zones

9. Study the map:

. Answer the following questions:-

(i) Name any two states having the density of population from 801 to 1000 persons per sq km.

(ii) Name any states which have population density from 401 to 600 persons per sq km.

10. Study the data given below carefully in the table and answer the following questions, (AH Indio 2008)
Decadal Growth Rate in India, 1901-2001

Answer the following questions:

- i) Which decade shows minus growth rate? What is the main reason for the decline in the population of this decade?
- (ii) Which decades are referred to as the period of steady population growth? Give one reason for it.
- (iii) Why has the population growth declined in the last two decades?

THREE MARK QUESTIONS

1. Population is the pivotal element in social studies. Support your answer giving three points
2. 'Despite the decline trend of the growth rate, the population of India is increasing at a faster rate'. Explain
3. What is migration? Explain the two types of migration.
4. What are the Pull and Push factors that influence rural urban migration in India?
5. What are the problems associated with the adolescents in India?
6. Explain the factors influencing the distribution of population in India.

FIVE MARK QUESTIONS

1. What is population change? Discuss the factors influencing population change.
2. Evaluate the role of NPP 2000 in the life of adolescents.

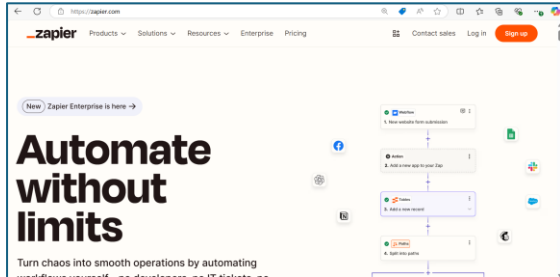

Map Work :

- i) The state having highest density of population.
- ii) The state having lowest density of population.
- iii) The state having highest sex ratio.
- iv) The state having lowest sex ratio.
- v) The most populous state of India.
- vi) The most sparsely populated state of India.

Assertions:

1. **Assertion 1:** A business with a high current ratio is considered financially stable.
Reasoning: The current ratio measures a company's ability to pay off short-term liabilities with its short-term assets.
2. **Assertion 2:** A company should opt for debt financing only when the interest rate on loans is lower than the expected return on investment.
Reasoning: If the expected return is higher than the cost of debt, the company can benefit from leveraging borrowed funds.

3. **Assertion 3:** Increasing the equity base of a company may dilute the control of existing shareholders.
Reasoning: Issuing new equity means that the ownership is shared with new investors, which may reduce the voting power of existing shareholders.
 4. **Assertion 4:** The price of shares of a company is primarily determined by its profitability and future growth potential.
Reasoning: The market value of a company's shares reflects the anticipated earnings and financial performance of the company.
 5. **Assertion 5:** Capital budgeting is an essential tool for businesses to assess the profitability of long-term investments.
Reasoning: Capital budgeting involves evaluating the potential returns and risks associated with long-term investments to make informed decisions.
