

## REPORT

### BAL SABHA ACTIVITY (2024-25)

#### KABAAD SE JUGAAD

**Date of the activity:** 25.9.24 (Preliminary Round) and 3.10.24 (Final round)

**Venue:** Respective Classrooms (Preliminary round) and Art Room (Final round).

**In-charges:** Class teachers of classes III- V and judges Mr. Niladri and Mr. Faiz for the final round.

#### **Introduction:**

Kabaad Se Jugaad- The 'Turning Trash into Treasure' initiative, held on September 25th (Preliminary Round) and October 3rd (Final Round), empowered students in grades III-V to become sustainability champions. This creative endeavor transformed discarded materials into stunning works of art, fostering teamwork, and problem-solving. The activity also helped them incorporate a profound appreciation for environmental conservation. Through collaborative group work, every student had the opportunity to contribute their unique ideas and perspectives, culminating in presentations that showcased their collective creativity and insights. Students made ingenious things like bird feeders from old bottles, photo frames using cardboard, and pen stands from plastic containers. Through this activity, students also learned valuable lessons about resourcefulness, sustainability, and the potential impact of individual actions.

#### **Highlights and objectives of the activity:**

The "Turning Trash into Treasure" activity was creative and engaging. It promoted sustainability and fostered crucial skills in students. Students collaborated in groups and transformed discarded materials into innovative, and visually appealing art pieces.

This hands-on project catalyzed creativity, encouraging students to think outside the box and explore unconventional ways to utilize waste materials. The collaborative nature of the activity fostered teamwork, communication, and problem-solving skills as students worked together to bring their ideas to life.

In the final round, the presentation component of the project allowed students to develop their public speaking and communication skills, as they confidently shared their creations with their peers.

By upcycling waste, students gained a deeper appreciation for environmental conservation and the importance of reducing waste. For instance, students creatively repurposed old bottles into bird feeders, crafted unique photo frames using discarded cardboard, and constructed functional pen stands from recycled plastic containers.

This activity empowered students to participate actively in creating a more sustainable future.
